Waste Incineration Mobile Incinerators

Animal & Waste Incinerators

We can now offer our range of incinerators exclusively throughout Europe and the rest of the world through our dealer network. Our range of units are fully CE certified, ensuring that we meet the highest standards in safety and construction. The mobile incinerator range of are ideal for shared facilities or remote places.

Mobile A850

Ease of Use

Auto ignition. No pilots to light. Set the timer and walk away.
Built-in skid facilitates placement

Fuel Efficiency

Rapid incineration means low fuel consumption.
Higher burn rate than smaller models.
Thick refractory lining in main chamber retains heat, increasing efficiency.

Quality Built to Last

Heat resistant 5mm steel.
Stainless steel stack.

Mobile Incinerators

Our latest range of mobile units lend themselves to a variety of uses, whether it is for shared facilities, camps, farms or even for disease control (Avian Influenza) in remote areas.

One of the unique features of this range is the natural secondary burn characteristics of the primary chamber.

The design of this model ensures extra air is drawn into the main chamber aiding primary combustion to ensure the efficient disposal of waste or carcasses at minimum cost.

These units are the highest standards for waste disposal, and benefit from being extremely durable for a long working life.

KEY FEATURES

- Galvanised twin axle trailer with ramp
- Integral fuel tank
- Diesel generator set
- Low running and maintenance costs
- Fully Automatic and simple to operate control panel
- Incineration Temperatures in Excess of 1300 degrees C
- Dense Refractory Concrete Lining Rated to 1600 degrees C
- Solid Hearth to Allow Maximum Burnout
- Top Opening Lid For Easy Loading
- Stainless Steel Flue as standard
- CE Marking
- EU ABPR / DEFRA Approved

The Mobile range of incinerators have options for larger fuel tanks and generator sets. The control panel is set up for easy use and will automatically shut off when the required incineration time is completed.

Fuel Tank & Generator

The trailer is rated to carry up to 2700kg , therefore there is plenty of additional space to carry extra items of equipment including generator sets, fuel and any other equipment. The trailer itself has fixed headboard and sides with the choice of a drop tailboard or a loading ramp (as shown opposite). Chassis, framework and panels are galvanized for maximum durability. The platform is hard wearing resin-coated high density plywood. Commercial rated tyres have been chosen for their high carrying capacity and strength.

Mobile version of A400 Incinerator

Mobile version of A850 Incinerator

These trailers have been built to withstand the rigours of the construction industry. The beam axle system features sealed, unitized wheel bearings and powerful auto-reverse brakes and is unequalled for strength and durability. The parabolic taper relief spring suspension has proved itself to be the best in the business and helps to provide the secure, stable towing characteristics and longevity. Other options available for these trailers are fixing rings, prop stands, weldmesh side extensions and aluminium treadplate flooring.
