

Rapid deployment solution for:

- ▶ **Planned Maintenance**
- ▶ **Unscheduled Downtime**
- ▶ **Emergency Cover**

Having the capacity and quality of care to provide professional bereavement services to citizens and society is an essential humanitarian requirement.

The unpredictable and varying nature of human life expectancy can create unplanned peaks in the operations of local bereavement services. Faltering processes, delays and complete failure are potentially very damaging within local authorities and the communities they serve.

Inciner8 has a pedigree in designing, engineering and supplying mobile and on demand cremation. We supplied containerised, mobile incineration units to the Liberian Government (Sponsored by the US Government) and supplied as a vital solution to the African Ebola Crisis.

In 2017 York Crematorium required additional capacity and a compliant and sure fast solution that would ensure they met the increasing demands of cremation. Inciner8 were hand-picked to deliver a guaranteed solution within 10 working days.

“We were pleased with the rapid support the team at Inciner8 provided during a challenging period for the council. They took a professional approach, and worked with us in trying to establish a temporary solution to our ongoing problems.”

The Bereavement Services team worked closely with Inciner8 in trying to provide its core function of maintaining a professional service for its citizens.”

A Yorkshire Crematorium**

Installation and Commissioning

Site Survey – precise plan and detailed drawings of the existing site with access points and the logistical checks for heavy plant and crane on a crematorium location.

Preparation - Suitable screening and confinement of the mobile unit in keeping with the crematorium surrounds and environment.

Planning - Liaison with York Council team, Crematorium Team, Environmental Agency and full Risk assessment

Project Managed - to ensure safest and quickest installation, managing as much of the process and situation for the customer but ensuring clarity and key project milestones including critical dates.

Training and integration - of the mobile system into an established infrastructure with utilities and contractor systems all managed and installed.

Ongoing maintenance - and bespoke refinements of the system to ensure performance and compliance at every stage.

Completion and extraction - were carried out with sensitivity. Extraction was in plain vehicles and during quiet hours to ensure minimal disruption.

Our i8-MCU Product, a hot hearth mobile cremation unit fits neatly into a standard 20-foot container and this product proved to be the precise solution and investment York Crematorium needed.

The Inciner8 team attended the York Crematorium site 24x7 to collaborate and implement the bespoke solution, providing live phone support whenever required.

The project proved to be good business continuity planning by City of York Council who managed to retrieve an element of their operational capacity relieving some of the pressures associated with their equipment failure, whilst continuing to deliver a Bereavement Services to the community.

Need to plan some downtime? Want peace of mind in case of catastrophic failure?

Speak to our cremation team today and get a plan in place for when you need downtime. Our mobile cremation units are for sale or can be leased for period of 3 months or more.

Our team are ready on **01704 884020** to assist you.
