

Pharmaceutical Waste Programme

The geographical size of the country and the remote locations of their field hospitals meant the Egyptian Armament Authority had to deploy a dedicated medical waste incinerator into each region to safely destroy out-of-date medicines, pharmaceuticals and other medical waste.

Due to local air quality guidelines the final specification included the addition of our Venturi Scrubber which cleans the exhaust emissions by spraying a fine mist of water (within a cyclone effect) to remove the heavier/dangerous particles in the gas. Being fitted with a unique liquid feeder meant that hazardous fluids could be added to the incinerator even while it was in full operation without opening the main chamber doors and losing heat.

Continual Remote Monitoring Means Offsite Expertise is Always At Hand.

Our 'SMARTPANEL Technology allows our engineers and chemists to gain access to your incinerator and its settings and logs. Our team of experts can make changes to these to ensure you get the best and most efficient incineration of your particular waste stream.

There is a better way...

Inciner8 Limited

Unit 2 Canning Road, Southport, Merseyside, PR9 7SN

Tel: +44 (0) 1704 884020

Email: enquiries@inciner8.com

Location:

Various, Egypt

Client:

Egyptian Military Armament

Waste Type:

Pharmaceutical Waste

Incinerator(s) Supplied:

26 x i8M-60 Venturi inc. Liquid Feeder

Features & Benefits

- ▶ Front loading design
- ▶ 2 second retention time at 1200°C
- ▶ Hazardous liquid feeder
- ▶ Venturi Scrubber Pollution Control
- ▶ Simple 'plug and play' operation.

INCINER8 were chosen as the winner of this prestigious contract based on our expert knowledge of medical waste and manufacturing pedigree within the UK.

This combined with our vast experience of dealing with larger orders and meeting tight deadlines in terms of project delivery and deployment resulted in the project being successfully installed within the agreed timeframes. This project once fully operational will be capable of processing upwards of 87 tonnes of medical waste per week.
